

I am voicing my opposition to the tolls bill HB6818 scheduled for a hearing on Feb. 25.

The cost of building these tolls, besides being fiscally irresponsible, will cost lives! This has been proven already! Also, the tolls will create more major traffic jams contributing to the already horrific traffic we already have! The tolls will also create major pollution from cars idling. Also in this day and age the enormous amount of money to rebuild the toll plazas should be utilized for better alternative transportation such as our trains, buses and shuttles and incentives for using car pools and other mass transportation not a toll system!

There is no common sense to this idea at all! There simply must be easier, cheaper, safer and more efficient ways to raise money besides raising taxes! Businesses are leaving our state at an alarming rate along with its population. This will only make it worse!

Please vote against this ridiculous bill!

Sincerely
